PROJECTS

[Venue Finder](#) — *Bootstrap, Javascript, Web APIs*

Worked with a team to create a web application that uses the Mapbox and
SeatGeek web APIs to provide a list of venues when a user enters a city to
search within.

[Fantasy Authors Quiz](#) — *Bootstrap, jQuery*

Created a web application using Bootstrap framework and jQuery which
quizzes users on their knowledge of fantasy authors, rewarding correct
guesses with points and subtracting time for incorrect answers

[Workday Scheduler](#) — *Bootstrap, Memory.js, jQuery*

Created a web application which tracks daily events during a standard
workday and utilizes client-side storage to save them.
